## Creative Sound Posts 200<sup>th</sup> Episode of *Forensic Files*

Orefield, PA - Creative Sound Studios has recently finished work on the 200<sup>th</sup> episode of *Forensic Files* for MedstarTelevision/CourtTV. *Forensic Files* is beginning its ninth season on CourtTV and is one of the channels highest rated programs. As a pioneer in the field of fact-based, high-tech, dramatic storytelling, *Forensic Files* delves into the world of forensic science, profiling intriguing crimes, accidents, and outbreaks of disease from around the

world. Not only are the stories from all over the country, but the production is too. Peter Thomas, one of the most recognizable voices in the business, sets the stage for each episode, laying down the narration in Naples, Florida. Music is scored by Alan Ett Music Group in Studio City, California, and then it all comes to Creative Sound where engineers Helena Schwoyer and Holley McElroy pull all the elements together and give each episode its

signature sound. The final mix is encoded in Dolby Prologic Surround.

## Creative Sound Installs Two New High Definition Systems

Creative Sound Studios has upgraded both of its control rooms to include Digidesign s ProTools HD|Accel 2 systems. These systems offer unparalleled sonic quality and a smooth and fast working

environment. With these new systems, Creative Sound can now record at sample rates up to 192kHz and mix up to 192 tracks. Couple this with their 600 sq. foot studio, 200 sq. foot control rooms, and sonically

transparent iso booths, Creative Sound is a premier place to record ensembles, bands, and solo musicians. Local and nationally known bands alike have enjoyed the pleasure of recording at Creative Sound. Lock-to-picture capabilities and a strong background in audio for video work also make Creative Sound the premier post production studio in the Lehigh Valley. With clients like *Forensic Files* (CourtTV), *Medical Detectives* (TLC), Penske Leasing, Mack Trucks, Crayola, and others, Creative Sound has proved itself time and again. Furthermore, with the addition of the new ProTools|HD systems, the studio is ready and able to meet the expanding needs of their clients producing projects in High Definition.

## 3<sup>rd</sup> Album for The Difference to be Recorded at Creative Sound

Air Products & Chemicals corporate band, The Difference, is scheduled to return to Creative Sound Studios in January to record their third studio album. These talented musicians were the winners of the First Annual Battle of the Corporate Bands, held at the Rock and Roll Hall of Fame, which earned the band a place in the Hall of Fame alongside a vintage Les Paul guitar. The

band travels all around the Lehigh Valley and beyond, playing for charity events and fundraisers. Last year they got the chance to rock the crowd at a NASCAR Busch Series event at Nazareth Speedway with their rendition of the National Anthem. Creative Sound enjoyed working with the band on their first two albums and is looking forward to working on this upcoming one.
